

Aerotight Manufacturing

Special Turned Parts

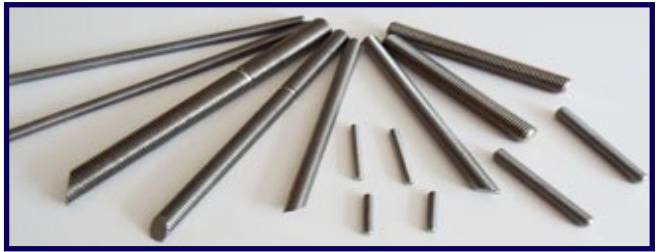

Aerotight Manufacturing has a long established reputation for producing high quality precision turned parts and special fasteners for a wide variety of industries.

- Capacity to produce from 2.00mm to 44.00mm diameter in high and low volumes.
- Manufactured in Steel, Stainless Steel, Brass and other alloys.
- All Materials certified with full batch identification.
- High quality production processes with full product traceability.
- Precision turned parts to customer drawings and specifications.
- Committed to excellent customer service.

Specials are produced in a variety of materials to customer drawings.

In-house manufactured Allthreads in both **A2 (304)** and **A4 (316)** Stainless Steel.

Apex Stainless Fasteners has an in-house Manufacturing Division producing specialist Stainless Steel products, including Aerotight® Nuts, Hexagon Rivet Bushes, Allthreads and turned-parts to drawing.

Approved by Lloyd's Register Quality Assurance certifying that the Quality Management Systems comply with **ISO 9001:2015**.
